LATEST WHITEPAPERS

## New apps for old

This Computing whitepaper examines the pain points associated with application deployment and management in an increasingly hybrid and rapidly changing IT environment. In particular, it looks at how companies striving for digital transformation are adopting new technologies to achieve those aims, from prioritising mobile support to data-driven process automation and AI, and at the impact these are having on development schedules.

## GDPR is a state of mind, not just a technology solution

GDPR is coming and there is no black and white compliance solution. Most businesses seem to worry but, with the right approach and the right combination of tools, building a sustaining framework to support GDPR and other regulations is possible. Download now to find out more.
