

Apple And Users Reporting iCloud Outage You Affected? [Updated]

BY [ALEX HEATH](#) • 2:23 PM, NOVEMBER 11, 2011

For the past hour or so it appears that iCloud has been undergoing outages, with many users unable to log into their email accounts or access their data on iCloud.com.

Apple has acknowledged the problem, and is working to restore service as quickly as possible. We'll update you as the situation changes.

The [iCloud system status webpage](#) gives up to date information on the status of the service. Here's the most recent message:

Users may be unable to access iCloud services. Normal service will be restored ASAP.

While iCloud is down, you may not be able to use your email address, Photo Stream, or other iCloud services. In the Mail app, you'll probably get prompts to re-enter your password. Just wait a little bit and everything should be back to normal.

We will update this page when there's word that iCloud has been fully restored. In the meantime, is iCloud down for you?

Update: As of 15:29 PST, iCloud is back online.
