Google Cloud Datastore Incident #19001

We investigated an issue with Google Cloud Datastore

Incident began at **2018-12-19 00:00** and ended at **2019-01-19 00:00** (all times are **US/Pacific**).

DATE	TIME	DESCRIPTION
✓ Feb 14, 2019	14:00	<div><h4>ISSUE SUMMARY</h4><p>Cloud Datastore experienced a low rate of errors associated with a small subset of high write-rate databases. We have separately notified the customers who may have been potentially impacted by these errors.</p></div> <div><h4>DETAILED DESCRIPTION OF IMPACT</h4><p>Beginning Wednesday December 19, 2018 and ending January 19 2019, Cloud Datastore experienced a low rate of errors associated with a small subset of high write-rate databases. Less than 0.1% of databases may have experienced these errors when called from the us-central1 region. We have separately notified the customers who may have been potentially impacted by these errors.</p></div> <div><h4>REMEDIATION AND PREVENTION</h4><p>We have identified and remediated the issue. As part of the remediation, we reverted to an earlier rollout ending the event. After verifying the issue was resolved, Google is taking steps to improve our existing testing scenarios to help prevent future recurrence.</p></div>

All times are US/Pacific
