

the 1990s, the incidence of *S. flexneri* has increased in the United Kingdom [10]. In the United States, *S. flexneri* has been reported to be the most common serotype of *S. flexneri* isolated from children with acute colitis [11].

There is a paucity of data on the epidemiology of *S. flexneri* in the United Kingdom. In the 1980s, *S. flexneri* was the most commonly isolated serotype of *S. flexneri* from patients with acute colitis in the United Kingdom [12]. In the 1990s, *S. flexneri* was the most commonly isolated serotype of *S. flexneri* from patients with acute colitis in the United Kingdom [13].

The aim of this study was to determine the epidemiology of *S. flexneri* in the United Kingdom. We determined the serotypes of *S. flexneri* isolated from patients with acute colitis in the United Kingdom, and we determined the serotypes of *S. flexneri* isolated from patients with acute colitis in the United Kingdom.

## METHODS

### Study area

The study was conducted in the United Kingdom. We determined the serotypes of *S. flexneri* isolated from patients with acute colitis in the United Kingdom, and we determined the serotypes of *S. flexneri* isolated from patients with acute colitis in the United Kingdom.
