Information Sources

The current status is calculated from the following information sources:

- ✓ User reports on downrightnow
- ✓ Feeds and official announcements

Troubleshooting Tips

Use these guidelines to help narrow down the cause of a service issue.

- Can you **reproduce the problem** by repeating the same steps? If not, it may have been a temporary glitch.
- If you're having trouble accessing a certain web site, make sure there isn't a problem with your Internet connection. **Can you reach other web sites** successfully?
- Does the same issue appear if you **use a different device** or Internet connection?
- Have you **recently changed any settings** or installed web browser plug-ins, firewall software, or other upgrades that might be causing trouble?

If you've ruled out these other possibilities and suspect a problem with Google Mail (Gmail), [report it here](#) to spread the word!
