Site largely unavailable 10 years ago

As of 5:18 UTC (10:18pm PDT) Twitter became largely unavailable. We're investigating.

UPDATE: 5:40 UTC (10:40pm PDT) Site recovering, but still slow. Timeline processing is delayed.

UPDATE: 6:05 UTC (11:05pm PDT) Site is generally available and timeline processing for most users has been current throughout this incident. Users returning to the site after a long absence, and a small random fraction of all users, may not have a timeline available for display. No tweets have been lost and all timelines should eventually display correctly.

UPDATE: 6:30 UTC (11:30pm PDT) All timelines should now display correctly.
