Update on bugs: device registration and image uploading 11 years ago

We're seeing lots of reports of "error D1051" from people trying to register a phone on twitter.com. We think this is being passed on from the provider we use to send SMS.

Also, many people are running into problems when trying to upload images for either avatar or background image (PNGs or JPGs under 700kb should be accepted.)

We're working on both of these critical bugs.
