Bursts of Errors *10 years ago*

We're seeing large bursts of errors every twenty minutes. We're currently investigating.

Update: 08:50 AM PDT: Our sidebar trends feature is exerting an elevated load on one of our databases causing the bursts of errors. As such, we've temporarily disabled sidebar trends and the site has fully recovered. We don't yet have an estimated time when sidebar trends will be re-enabled.

Update: 1:00 PM PDT: We've re-enabled side bar trends.
